

High Quality Replacement Products

CADEKA continues to manufacture devices discontinued by original suppliers such as Comlinear Corporation, Fairchild, KOTA Microcircuits, Raytheon, and Signal Processing Technologies. With a few exceptions, CADEKA Replacement Products are manufactured using the exact die, assembly house, test program, test hardware and system as used by the original supplier. Most of our staff of test engineers, manufacturing operators, as well as designers, has intimate knowledge of CADEKA Replacement Products.
